

LSU¹

Next generation video surveillance.

New. Powerful. Strong.

Cameramanager LSU is the powerful solution for IP video surveillance projects with tough performance demands. Ranging from a small mini-server to a dedicated rack-server the LSU delivers excellent results.

Efficient NVR solution.

Superior image quality and high performance at the same time. The LSU offers efficient performance to be able to manage up to 128 cameras on a single server. Different models are specifically designed for projects in schools, universities, retail or buildings.
