

## Job: Quality assurance manager

### About Cameranager.com B.V.

Cameranager.com is a fast growing enterprise active in the field of software development for IP camera security (VSaaS, video surveillance as a service). The huge growth in IP camera sales has increased the interest in IP camera surveillance software.

Cameranager.com develops and delivers complete online service for IP camera security, named [www.cameranager.com](http://www.cameranager.com). The platform manages 10-thousands of IP cameras worldwide. The camera

streams are being stored in a professional datacenter in Amsterdam. Cameranager.com develops their software in a Java based environment for front-end and back-end of the software. The complete development team is housed in the Netherlands. On a daily base the team is busy with development of features like H.264, plug&play IP cameras, storage cloudbanks and many more.

Cameranager.com is a young and ambitious company with 14 employees located in Almere and is part of Detron, a company of 500 people. The company grows fast and has the ambition to grow towards one the most recommended international companies for video surveillance.
